Get The World's First *2ND Generation* Satellite Phone for

A free satellite phone? C'mon, what's the catch?

You pay \$50 to activate the phone at *RF Gear 2 Go* (a Cybergear division) - which covers both the shipping to you and the activation of your new Globalstar satellite phone.

You agree to a 12 month contract at \$99.99 per month (plus applicable tax) for your unlimited minutes of voice or data satellite service per month - which works out to roughly \$3.33 a day, and we'll give you the brand new Globalstar satellite phone for **FREE** (limited time offer - expires 06/30-17). The phone is yours to keep after the 12 month contract ends.

If you act quickly, you can have unlimited satellite phone and data service for less than what most folks pay for spotty off-grid cellular service! Never worry again about being off-grid (or cell tower failure) with no communication capabilities.

How does it work compared to my cellular service?

Cell towers are normally installed within major cities/towns, while satellite phones connect to orbiting satellites, which means all satellite phones (or their antennas) need to be able to see open sky to make or receive their calls.

Where do I sign up and how long does this special offer last?

Contact Craig Carnahan with *RF Gear 2 Go* at 866-448-4327 x300 (toll-free) or via email at Craig.N7LB@gmail.com.

This amazing free satellite phone promo is a limited time offer, so act now and save \$499.00 in upfront hardware costs alone, plus another \$1,200 (\$100 a month off the normal \$199.99 unlimited monthly service plan), for a total savings of \$1,699.00.
